

PRECISION HYDROGRAPHIC SERVICES AWARDED QUALITY MANAGEMENT SYSTEM CERTIFICATION

ADELAIDE, AUSTRALIA

Wednesday, March 23, 2016

Precision Hydrographic Services obtains ISO 9001:2008 by ECAAS Certification

Precision Hydrographic Services (PHS) offer consultancy and surveying services that specialise in the acquisition, interpretation and reporting of seabed information. Recently, PHS has taken significant steps towards ensuring their high standards of service delivery meet the ongoing needs of clients and other stakeholders.

Following ECAAS Certification's extensive multi-day audit, PHS has been awarded ISO 9001:2008 certification. ISO 9001 certification confirms that an organisation is committed to achieving customer satisfaction, has systems in place to capture, record and meet client requirements, and has the ability to monitor and continuously improve its performance.

"Achieving ISO 9001 certification represents a major milestone for our organisation. It demonstrates our commitment to quality, as well as continually improving our processes to ensure client satisfaction", said Neil Hewitt, PHS Managing Director.

"Being a certified organisation comes with great responsibility for all employees, and one which reinforces our commitment to PHS company values - Professionalism, Leadership, Quality, Teamwork, and Customer focus." he continued.

By incorporating ISO standard, PHS benefits from defined and documented procedures, which improve the consistency and quality of output, provides greater commitment toward fulfilling client requirements, and continuous improvements in services delivery.

PHS provide specialist hydrographic surveying services for navigational safety, nautical charting, coastal zone management, dredging operations, habitat mapping and related activities. PHS provide a complete survey service which is conducted and approved by a Level 1 surveyor, providing complete confidence in surveys used.

- ENDS -

NB: PHS is currently progressing to the latest edition ISO 9001:2015 certification which was released September 2015.
