

PRECISION HYDROGRAPHIC SERVICES CELEBRATES 10 YEARS IN BUSINESS

ADELAIDE, AUSTRALIA
MONDAY 12 MARCH, 2018

2018 marks company milestone for Precision Hydrographic Services

Precision Hydrographic Services is a leader for providing high quality hydrographic survey data and a company which started from humble beginnings. PHS, formerly Swathe Services Australia, commenced in 2008 as a single man operation. Neil Hewitt worked from his spare room at home, and has grown the business to where it is today - employing thirteen dedicated staff, and offices in Adelaide and Karratha.

PHS have built enduring partnerships with hydrographic organisations, offshore and ports & harbor industries worldwide and have established themselves as a provider of reliable, high quality information, and specialist for hydrographic surveying services for navigational safety, nautical charting, coastal zone management, dredging operations, habitat mapping and related activities.

Neil Hewitt comments,

“The past ten years is certainly a milestone I am very proud of. I would like to thank all our suppliers and clients for their ongoing support and business. The relationships we have developed over the years are fundamental to our success.

Neil continues,

“We believe our purpose is to provide our clients with a greater understanding of the environment in which they operate by providing a service that is honest and provides our clients with knowledge to make well informed decisions about their marine requirements.”

The company’s growth has in no small part been due to the high calibre of people who have joined the team over the years. All staff are highly qualified, experienced and committed to upholding company values.

As the business celebrates its 10th anniversary in 2018, further expansion is inevitable in line with its continued level of customer satisfaction. PHS aim to develop a long-term sustainable business that customers can rely on to provide a consistent quality service on time and within budget.

Neil reflects,

“PHS’ growth has been fueled by a combination of the capability of our people, our software and technology, and our dynamic approach in providing an unmatched, personalised, certified hydrographic consultancy service to organisations undertaking hydrographic surveys or projects.”

Congratulations on the last 10 years in business PHS!
